

<p>Well done to Ben Jennings for completing his first day of his hill conversion with us at Cloudbase. Even though Ben had very little ground handling experience from his previous School it didn't take him long to pick it up and he was reverse launching and doing small hops from our private easterly training slope within a few hours.</p> <p>Ben really enjoyed his day and will be back the next time its flyable to carry on with his hill conversion.</p> <p>Well done again. </p>
